PROJECTS

Smart canteen ordering platform for college community using web technologies

The Smart Canteen Ordering Platform is a web-based application that allows college students and staff to order food online. It reduces waiting time and helps the canteen manage orders efficiently using web technologies and a database. (2024-2025)

Intelligent Ransomware Detection Using Machine Learning

The Intelligent Ransomware Detection system uses machine learning techniques to identify ransomware by analyzing file behavior and system activities. The goal is to detect malicious actions early and prevent data loss. (2025-2026)

Hospital Management System

Developed a Hospital Management System using Java, Spring Boot, HTML, CSS, JavaScript, and MySQL to streamline patient management, appointment scheduling, billing, and secure database operations. (2026)

INTERNSHIP

Java Full Stack Developer Intern

Cloud Institution, Bangalore | Feb 2026 – Aug 2026
